

## **02 Course: Patient Records - EHR & EMR**

**Modality: Self-Paced Learning**

**Duration:**

Patient Records - EHR & EMR provides comprehensive training on managing electronic health records (EHR) and electronic medical records (EMR), equipping students with the skills needed to efficiently store, retrieve, and analyze patient information in a digital healthcare setting. Participants will gain a deep understanding of industry standards, data security, and best practices for maintaining accurate and accessible patient records.

**Course Outline:**
