

Course 3 - Sinus Mechanisms & Atrial Rhythms

Modality: Self-Paced Learning

Duration:

The course on "Sinus Mechanisms & Atrial Rhythms" provides students with an in-depth understanding of the normal electrical activity originating from the sinoatrial (SA) node and atrial tissues in the heart. This course explores the mechanisms underlying sinus rhythms, which are the normal heartbeat patterns initiated by the SA node, as well as various atrial rhythms that can occur due to abnormalities in atrial electrical activity.
