Course 9 - Using the Electronic Health Record for Reimbursement

Modality: Self-Paced Learning

Duration:

The course on "Using the Electronic Health Record (EHR) for Reimbursement" is designed to educate healthcare professionals, particularly billing and coding specialists, on leveraging EHR systems to facilitate accurate and efficient reimbursement processes. This course equips learners with the knowledge and skills necessary to navigate EHR functionalities related to coding, billing, and revenue cycle management to ensure timely and accurate reimbursement for healthcare services.
